Configured
FT-1 Switch

CONFIGURE VIEW

Use the Search bars to load a known Style No. or Code No. for FT-1 or FT-14.

Helpful links including a link to configure an FT-19R assembly.

Use the **Data Sheet** button for a summarized printable view.

SUMMARY VIEW

Available test plugs that match the style no. are listed here.

Use the **Print** button to obtain a hardcopy print-out of the page.

Key terms

Style No. - Part number or catalog number used as a unique identifier.

Code No. - An identifier for FT-1 switch's electrical representation. It also includes color information and is used primarily with FT-19R switch assemblies.

Arrangement - Representation used to identify each pole according to function. The arrangement is also necessary for an order request that does not have a style number (in other words, when "NOT FOUND, order by Arrangement" appears as the Style No.)

Ordering Tips

Usually the Style No. is all that is needed for ordering, however, if a Style No. is not found then please do the following:

• Confirm that you are on the SUMMARY VIEW.

• Capture the SUMMARY VIEW screen by pressing the [Alt] key + [Print Screen] key on the keyboard.

• This will allow you to paste the copied window into a word processing tool such as Microsoft Word and retain all the necessary information.

• From there, simply email the document to the appropriate ABB sales contact.

The simple, reliable, safe, and fast way to test equipment also with a **12**-year warranty.
